RESEARCH

Efficient and scalable LLM and agentic systems — *system–method co-design* — and rigorous ways to measure whether the efficiency is real.

EDUCATION

Ph.D. in Computer Science 08/2024 - Present

Rice University, Houston, TX

- Advisor: Prof. Hanjie Chen, Chili Lab (08/2025 – Present)
- Advisor: Prof. Xia "Ben" Hu, Data Lab (08/2024 – 08/2025)

B.S. in Computer Science 05/2024

Case Western Reserve University, Cleveland, OH

- Department of Computer and Data Science. Advisors: Prof. Shuai Xu and Prof. Vipin Chaudhary.

RESEARCH INTERESTS

- **Memory-bound LLM inference.** KV cache compression, quantization and transform coding for long-context and agentic workloads.
- **Conditional computation.** Mixture-of-Experts and training-free routing that turn static redundancy in pretrained models into input-dependent sparsity — and the serving systems that realize it under real memory budgets.
- **Efficient and verifiable agentic systems.** Cutting redundant computation and communication in LLM agents and multi-agent systems — and rigorously evaluating whether reported efficiency gains are real.

EXPERIENCE

Research Intern, AI Research & Development 05/2026 - Present

Nokia, Sunnyvale, CA

- Efficiency and system–method co-design for large-model inference; led the design and open-source release of AnyJev (below).

OPEN SOURCE

AnyJev — lead author and principal maintainer 1,492★ · 171 forks 2026

Nokia Applied Research · github.com/nokia-applied-research/AnyJev · `pip install anyjev` · technical report arXiv:2610.00831

- Turns any LLM into a typed decision model with calibrated probabilities, training-free by default — served through vLLM as a pooling endpoint plus a few kilobytes of closed-form head.
- Cuts option-order sensitivity 0.230→0.073 and calibration error 0.240→0.095 with zero labels; raises the share auto-decidable at 5% risk from 7.7% to 52.0% with 100–500 labels.
- Passed 1,000 GitHub stars in its first ten days; released under Apache-2.0 with a published PyPI package.
- Highest-placed training-free system on the community Jev Decision Index (v0.3.2): joint 4th of 148, ahead of the Jev reference itself.

HONORS AND AWARDS

EMNLP 2026 Award Nomination — for "Rethinking the Evaluation of Efficiency Methods for Multi-Agent Systems" 2026

Swanger Graduate Fellowship — Case Western Reserve University 2024

The Computer and Data Science Research Award — Case Western Reserve University 2024

Dean's High Honor List & Latin Honors — Case Western Reserve University 2024

PROFESSIONAL SERVICE

Conference Reviewer — NeurIPS, ICML, ACL

Journal Reviewer — IEEE TPAMI, IEEE TCDS, ACM TIST, ACM TCH, Neurocomputing

Languages — English, Mandarin Chinese

TEACHING

Guest Lecture, COMP 640 — Graduate Seminar in ML: Large Language Models · Rice University 2026 Fall
"A Simple Intro to Test-Time Scaling & Reasoning: Thinking longer, thinking better"

TA, COMP 584 — Natural Language Processing · Rice University 2026 Spring

TA, COMP 631 — Introduction to Information Retrieval · Rice University 2025 Spring

TA, CSDS 302 — Discrete Mathematics · Case Western Reserve University 2022, 2023, 2024

TA, CSDS 386 — Quantum Computing, Information, and Devices · Case Western Reserve University 2023 Spring
